.NET Software Developer / Analyst

Tein Technology is passionate about new technologies. You too? Are you looking for a varied job? Not afraid of a challenge? Do you want to analyze and solve technical challenges in high-end security and automation systems? **Then join our technical team as Software Developer!**

Mainly active in Belgium and the Netherlands, we are a leader in the integration of voice, video and control room platforms for clients such as banks, ports, road and waterway traffic centers and police.

Job Description

As a software developer and analyst in Tein Technology's Innovation & Development department you create solid software solutions to be integrated into diverse state of the art platforms.

System Design and Development:

- **Analyse** customer needs and **design a software solution** based on the functional requirements.
- **Develop, test and implement** your solution in an agile development environment.
- Create the required documentation so colleagues can manage operational requests.
- Recommend system changes and improvements.
- Integrate Tein software solutions with existing systems.
- Support field tests and implementations in order to prove the quality of your development.
- Assist field engineers and project engineers to roll-out your solution.

Position's Requirements

Education, Knowledge & Work Experience:

- **Bachelor or Master degree** in Computer Sciences or equivalent.
- You have at least **3 years of professional experience** as a software developer.
- Experienced with the **.NET stack**: C#, ASP.NET MVC, Webservices, WCF, Entity Framework.
- Practical knowledge of **web frameworks** like React or Angular.
- Familiar with web standards (Rest, SOAP, JavaScript, HTML, CSS, XML, JSON)
- Good knowledge of Microsoft SQL server and database design.
- Experience with networking and virtual environments is a plus.
- Operational expertise of data analytics and reporting tools is an asset.

Who You Are:

- You are a team player with a down-to-earth and a can-do mentality.
- You have a hands-on mindset and you are solution oriented.
- You are innovative and ready to bring new proposals.
- Willing to work in a managed team, to use industry standards and contribute to team knowledge.
- Commercial thinking
- Troubleshooting skills
- Fluent in Dutch; English and French are an asset.

OFFER

- Working for Tein Technology means joining a dynamic and professional team of talented colleagues in a unique working environment: a modern green site in the heart of Brussels.
- You will have the opportunity to join an organization which is active in offering state-of-the art technological solutions to business customers and to work in a team which daily faces high-end challenging environments.
- Our employees are constantly kept up to date via technical and professional training programs.
- Tein Technology offers an attractive salary package.
